

**A. Amendments to Claims:**

1. - 12. ( previously withdrawn)

13. (currently amended) A sun shield which is attachable to a vehicle for blocking glare from the sun, the vehicle having a visor and a side window, said sun shield comprising:

a [connector] clamp for selectively directly attaching said sun shield to [the vehicle] a desired location on one of (1) the visor, and (2) the side window;

a swivel attached to said [connector] clamp;

a plurality of blades pivotally attached to said swivel, wherein each of said plurality of blades is rotationally positionable about said swivel; and,

wherein said [connector] clamp may be directly attached to [the vehicle] one of (1) the visor, and (2) the side window, and a said blade rotated so that said rotated blade blocks glare from the sun.

14. A sun shield according to Claim 13, further including:

said plurality of blades including blades having different lengths.

15. A sun shield according to Claim 14, further including:

said plurality of blades arranged in order from shortest to longest.

16. - 20 (canceled)

21. (currently amended) A sun shield according to Claim 13, the vehicle having a visor and a side window, said sun shield further including:

said plurality of blades including blades of different lengths;

said plurality of blades including blades of different widths;

said plurality of blades being one of (1) opaque and (2) translucent; and,

each of said plurality of blades having a racetrack shape [; and,

said sun shield attachable to one of the visor and the side window].

22. (new) A sun shield attachable to a vehicle for blocking glare from the sun, the vehicle having a visor and a side window, said sun shield comprising:

a clamp for selectively directly attaching said sun shield to a desired location on one of (1) the visor, and (2) the side window;

a swivel attached to said clamp; and,

at least three of blades pivotally attached to said swivel, wherein each of said blades is rotationally positionable about said swivel.

23. (new) A sun shield according to Claim 22, further including:

five said blades pivotally attached to said swivel.

24. (new) A sun shield according to Claim 22, further including:

said at least three blades arrangeable in a fanned configuration for blocking large areas of glare.

25. (new) A sun shield according to Claim 22, further including:

when said clamp is attached to a desired location on one of (1) the visor, and (2) the side window, one said blade rotationally positionable to block one source of glare, and another said blade rotationally positionable to block another source of glare.

26. (new) A sun shield according to Claim 22, the vehicle having side window weather stripping, said sun shield further including:

five said blades pivotally attached to said swivel;

said five blades arrangeable in a fanned configuration for blocking large areas of glare;

one of said five blades insertable between said side window and said side window weather stripping to serve as an anchor for supporting a remainder of said blades; and,

when said clamp is attached to a desired location on one of (1) the visor, and (2) the side window, one said blade rotationally positionable to block one source of glare, and another said blade rotationally positionable to block another source of glare.

27. (new) A sun shield attachable to a vehicle for blocking glare from the sun, the vehicle having a side window having side window weather stripping, said sun shield comprising:

a clamp for selectively directly attaching said sun shield to a desired location on the vehicle;

a swivel attached to said clamp;

at least three of blades pivotally attached to said swivel, wherein each of said blades is rotationally positionable about said swivel; and,

one of said blades insertable between said side window and said side window weather stripping to serve as an anchor for supporting a remainder of said blades.

28. (new) A sun shield according to Claim 27, further including:

five said blades pivotally attached to said swivel.

29. (new) A sun shield according to Claim 27, further including:

said remainder of said blades arrangeable in a fanned configuration for blocking large areas of glare.

30. (new) A sun shield which is attachable to a vehicle for blocking glare from the sun, the vehicle having a lowered visor having a top, said sun shield comprising:

a clamp for selectively directly attaching said sun shield to a desired location on the top of the lowered visor;

a swivel attached to said clamp;

at least three of blades pivotally attached to said swivel, wherein each of said blades is rotationally positionable about said swivel; and,

when said sun shield is attached to the top of the lowered visor, one of said blades rotatable so that said blade extends below the lowered visor.
